Environment, Occupational Health & Safety and Energy Management Policy

Trina Solar is committed to being the world's leading smart energy and energy Internet solutions' provider. We pay attention to employees' health & safety and sustainable development. We are dedicated to creating a safe, healthy and environmentally-friendly workplace for employees and a harmonious green planet for mankind. We promise to use energy and natural resources responsibly and efficiently. Herewith we pledge the following:

1. Comply with all applicable EHS & energy management laws & regulations and meet interested parties' requirements.
2. Be committed to prevention of pollution and minimizing negative impact on environment. Promote sustainable development and build a green and low-carbon planet.
3. Be committed to prevention of occupational injury and illness. Provide a safe, healthy and environmentally-friendly workplace for employees.
4. Make efficient use of energy and resources. Consistently reduce energy consumption and carbon emission from production and commercial operations.
5. Enhance employees' EHS & energy conservation awareness and encourage employees to participate in EHS & energy conservation programs.
6. Provide necessary resources for implementing EHS & energy management system. Continually improve performance via perfecting EHS & energy management system.
7. Provide transparent EHS report to stakeholders and other relevant interested parties.
8. Pledge our support and commitment to help our suppliers improve their EHS & energy management performance and take social responsibility.
