

Trina Solar's C&I Solutions offers equipment prices ranging from \$0.50-0.80/Watt depending on the project (canopy projects typically more). Contact your regional Trina Solar sales representative for inquiries and to learn how our C&I Solutions can assist with your success.

Fully integrated world-class components

Modern solar projects require the seamless interaction of PV modules and inverters, along with versatile racking and dependable storage. Trina Solar's C&I Solutions gives you all of this in one platform:

- String and central inverters are available in multiple sizes with 1,000V and 1,500V options available.
- Trina Solar's C&I Solutions can accommodate a wide range of commercial project requirements through its support for fixed-tilt ground, canopy and rooftop mounting.

Custom project services and support

Trina Solar's C&I Solutions custom-scopes each commercial project to ensure the right alignment of solar products and services. Plus, your dedicated C&I Solutions representative is always available as a single point of contact for any service request, from troubleshooting a technical issue to requesting infrastructure upgrades.

Design and deal flow software

Need help getting started on your system design? Design and deal flow tools from Trina Solar's C&I Solutions will make life easier. Use our software to create accurate prospective system layouts as well as customizable proposals and workflows to keep your business operating efficiently. The upshot is a more streamlined business process from the initial sale all the way to eventual installation of your commercial project.

Supply Security and Visibility

As the demand for modules continues to grow in 2019-20, securing Tier 1 quality modules could become a major hurdle for your project procurement. Partnering with Trina Solar, the C&I solution helps mitigate this risk as a one-stop shop for your commercial project needs. Bottom line, Trina Solar has better control over module supply to help your projects succeed.
