High power output
• Up to 405W front power and 20.0% module efficiency with half-cut technology enabling higher BOS savings
• Lower resistance of half-cut cells ensures higher power

Certified to perform in highly challenging environments
• High PID resistance through cell process and module material control
• Resistant to salt, acid, sand, and ammonia
• Proven to be reliable in high temperature and humidity areas
• Certified to the best fire class A
• Minimizes micro-crack and snail trails
• Certified to 5400 Pa positive load and 2400 Pa negative load

High energy generation, low LCOE
• Up to 25% additional power gain from back side, depending on the albedo
• Excellent 3rd party validated IAM and low light performance with cell process and module material optimization
• Low temp coefficient (-0.35%) and NMOT increases energy production
• Better anti-shading performance and lower operating temperature
• Higher power from same installation footprint as standard modules

Easy to install, wide application
• Frame design enables compatibility with standard installation methods
• Deployable for ground mounted utility, carports, and agricultural projects
• Safe and easy to transport, handle, and install like normal framed modules

Trina Solar’s DUOMAX Performance Warranty

From the 2nd year to the 30th year, the average annual power decline will be no more than 0.5%.
