Great for residential rooftop application
• Maximize limited space with up to 202 W/m² power density
• Ultra-thin, virtually invisible busbars

Half-cut cell design brings higher efficiency
• Low thermal coefficients for higher energy yield at elevated operating temperatures
• Reduced interconnection losses

High power output
• Multi busbar technology combined with mono PERC cells
• Reduced BOS costs with higher power bins and 1,500V system voltage

Highly reliable due to stringent quality control
• Over 30 in-house tests (UV, TC, HF, and many more)
• In-house testing goes well beyond certification requirements
• PID resistant
• 2x 100% inline EL inspection

Certified to withstand challenging environmental conditions
• Salt Mist Corrosion
• Ammonia Corrosion
• Blowing Sand
