FULLY INTEGRATED
SMART SOLUTION

As a leading global manufacturer of next generation photovoltaic products, we believe close cooperation with our partners is critical to success. With local presence around the globe, Trina is able to provide exceptional service to each customer in each market and supplement our innovative, reliable products with the backing of Trina as a strong, bankable partner. We are committed to building strategic, mutually beneficial collaboration with installers, developers, distributors and other partners as the backbone of our shared success in driving Smart Energy Together.

Safer Solar
- Panel-level disconnect to remotely deactivate modules
- Arc, fire and safety hazard mitigation

More Efficient O&M
- Panel-level monitoring to pinpoint problems
- Detailed real-time alerts and analytics

Highest Power Density
- Install more modules on any roof
- Uneven string lengths enables design flexibility

Maximized Energy Harvest
- Impedance matching technology eliminates mismatch losses
- More power from each module bin

Lower BOS Costs from Smart Curve Technology
- 30% lower max open circuit voltage, 30% longer strings
- Fewer combiners, fuses and copper wiring required

Fully Integrated
- Compatible with any inverter
- No additional boxes to mount on module

LINEAR PERFORMANCE WARRANTY
10 Year Product Warranty • 25 Year Linear Power Warranty
Trinasmart modules incorporate innovative power electronics from Tigo Energy to achieve module-level diagnostics, maximum energy harvest through module level DC power optimization, and reduction of arc, fire and safety hazards.

Integration of the module optimizer into the junction-box enables patented Smart Curve technology, which allows up to 30% longer strings and significant balance-of-system (BOS) savings.

**SYSTEM ARCHITECTURE**

Trinasmart system components work together with any inverter to maximize energy harvest. Trinasmart modules communicate wirelessly through the gateway, allowing users to monitor system performance in real time.

**SMART CURVE TECHNOLOGY**

Module-integrated Trinasmart technology reduces the open circuit voltage range for each module and allows longer strings to be designed. The maximum voltage is programmed by Trina Solar in the factory.

- Hardware voltage clamp prevents over-voltage
- Design up to 30% longer strings
- Fewer combiner boxes, fuses and wiring
- Smaller resistance losses
- TUV & CSA certified
The Gateway provides wireless communication with up to 120 Trinasmart modules and the MMU. Up to seven Gateways can be connected to a single MMU.
